\ WHAT'S IN THE SET /

① SIM Case

② SIM Card

③ SIM Pin

\ APN (Access Point Name) /

APN (Access Point Name) It's a setting on mobile devices that allows the device to connect to a specific mobile network's data service. Each network operator has its own APN settings.

Country	APN & APN Name	Username	Password	Authentication
Japan (Softbank)	plus.4g	plus	4g	-
Japan (IIJ Mio)	vmobile.jp	-	-	-
Taiwan	internet	-	-	-
South Korea	internet	-	-	-
Philippines	mobiledata	-	-	-
Asia 6	internet	-	-	-
Europe 33	drei.at	-	-	-
China/Hong Kong/Macau	internet	-	-	-

\ SETTINGS /

Step 1

Upon arrival in the destination country, please insert the SIM card into your phone.

Step 2

Please wait just a moment for your phone to connect to the network signal.

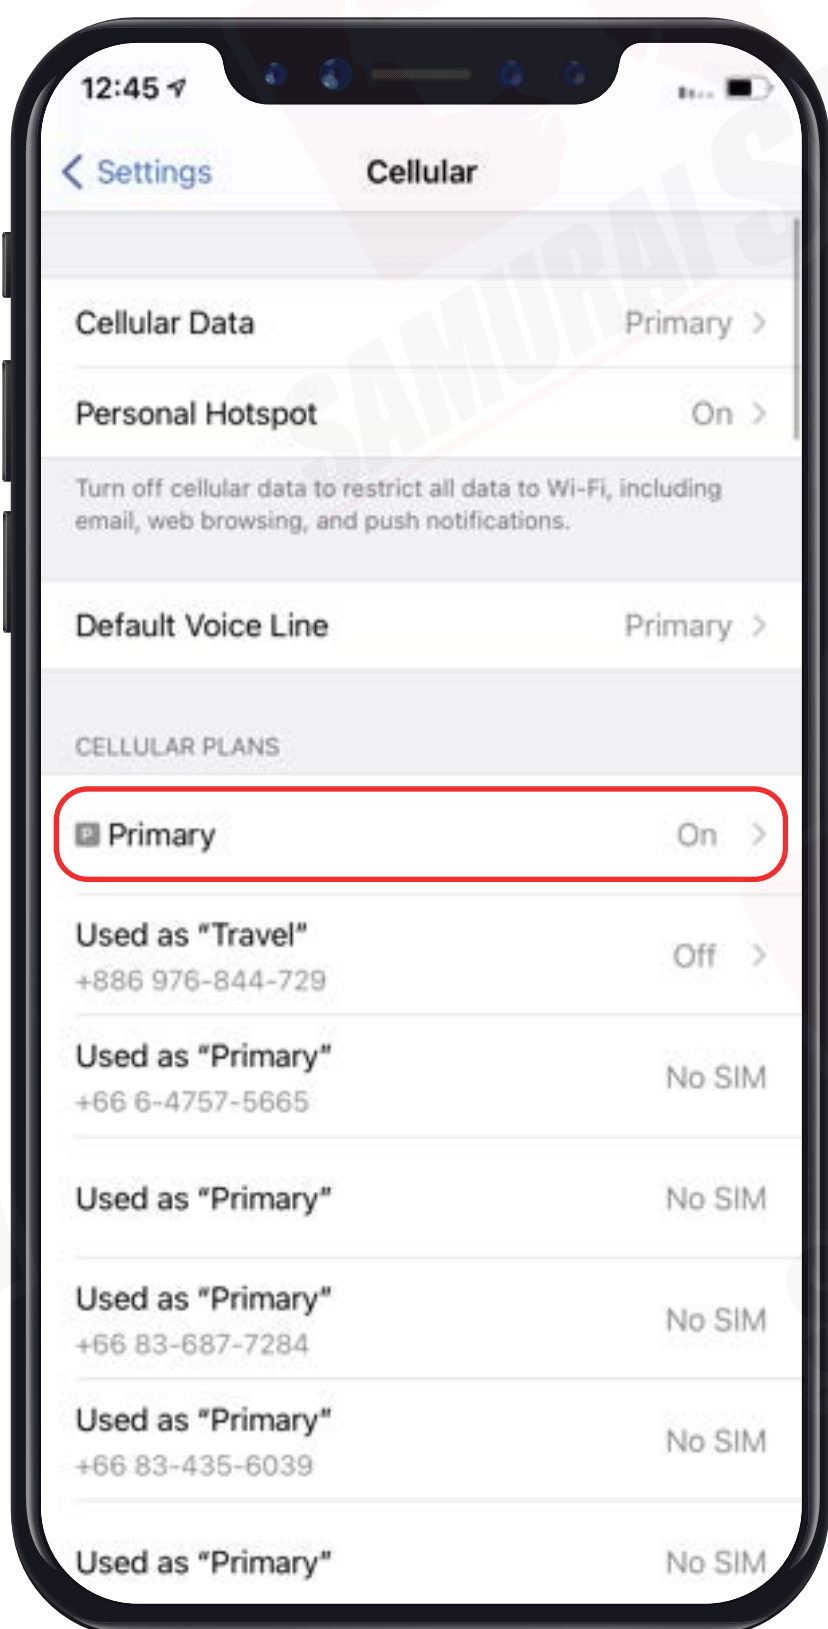

The date your phone connects to the network will be counted as the first day of usage.

Step 3

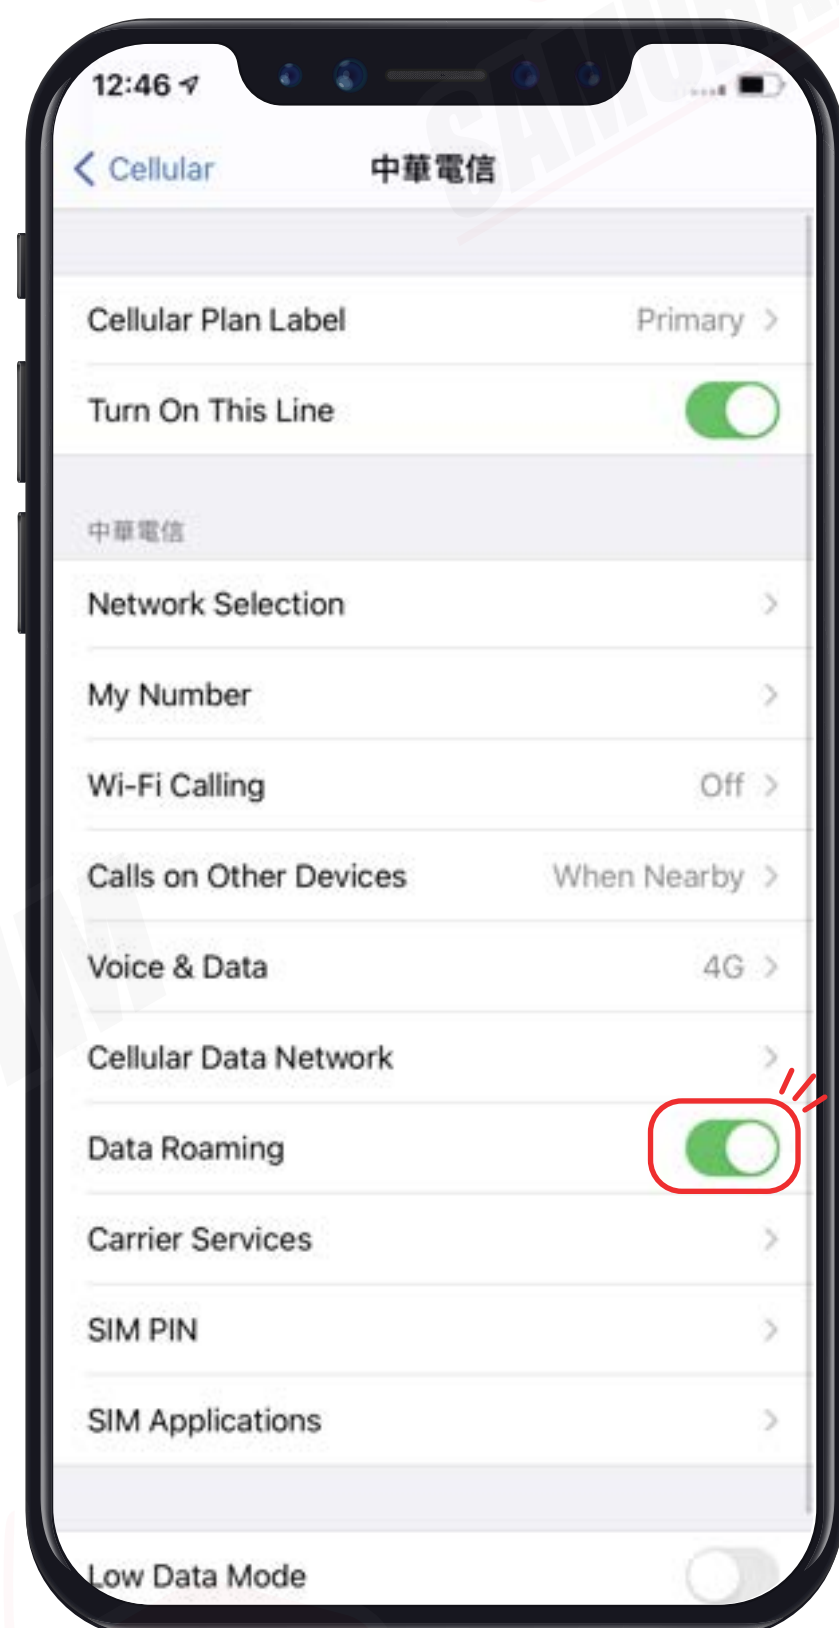

After that, please follow these steps to turn on data roaming:

1 Go to Settings and tap on "Cellular"

2 Tap on "Primary"

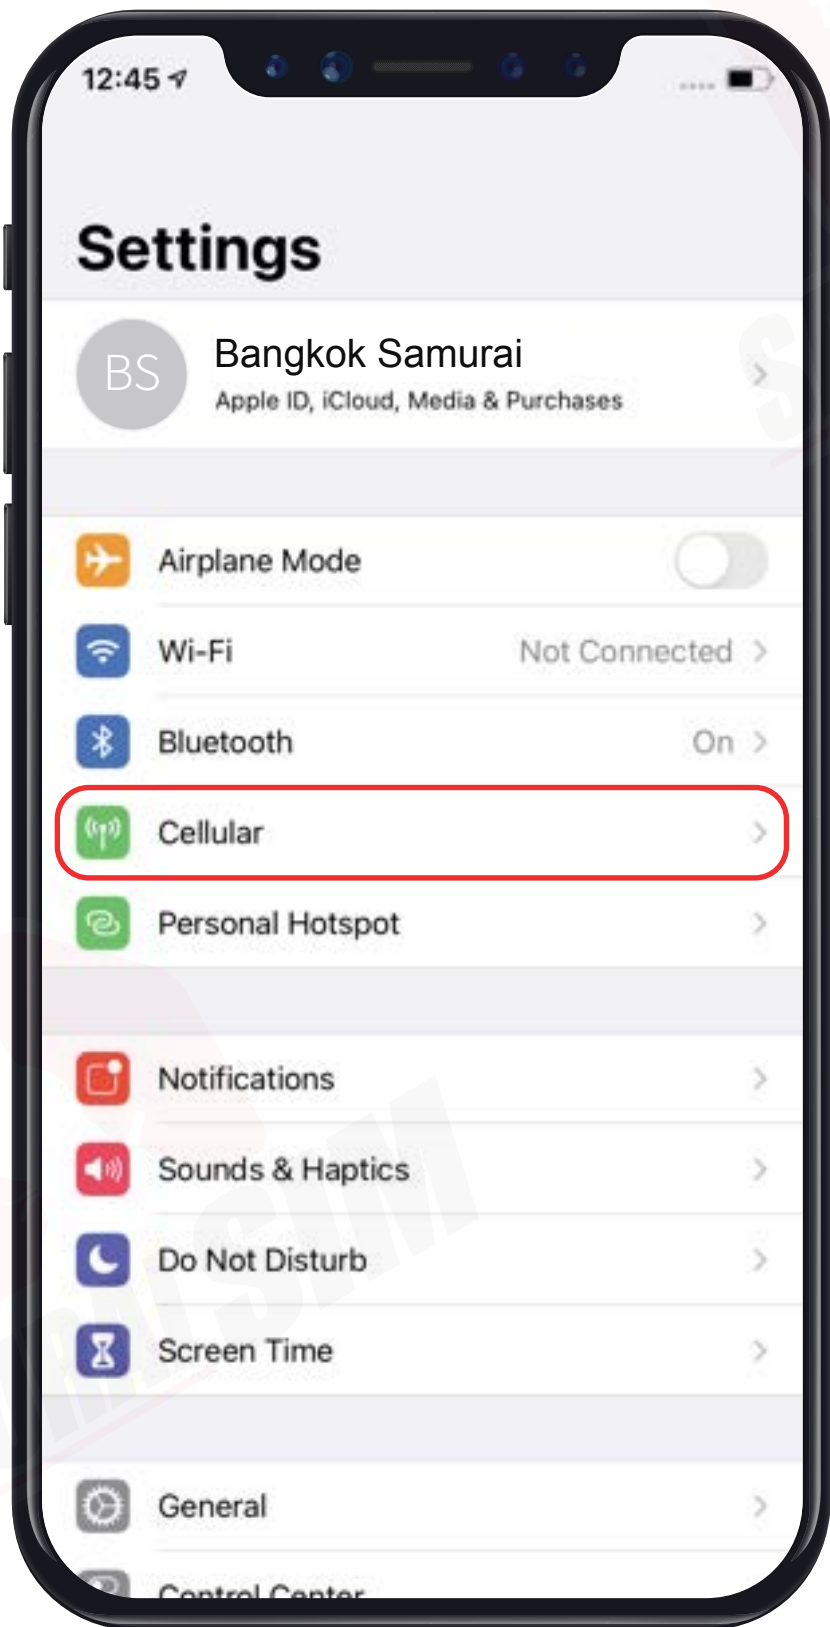

3 Turn on "Data Roaming" Then Enjoy!

If it still doesn't work, please do the APN Settings.

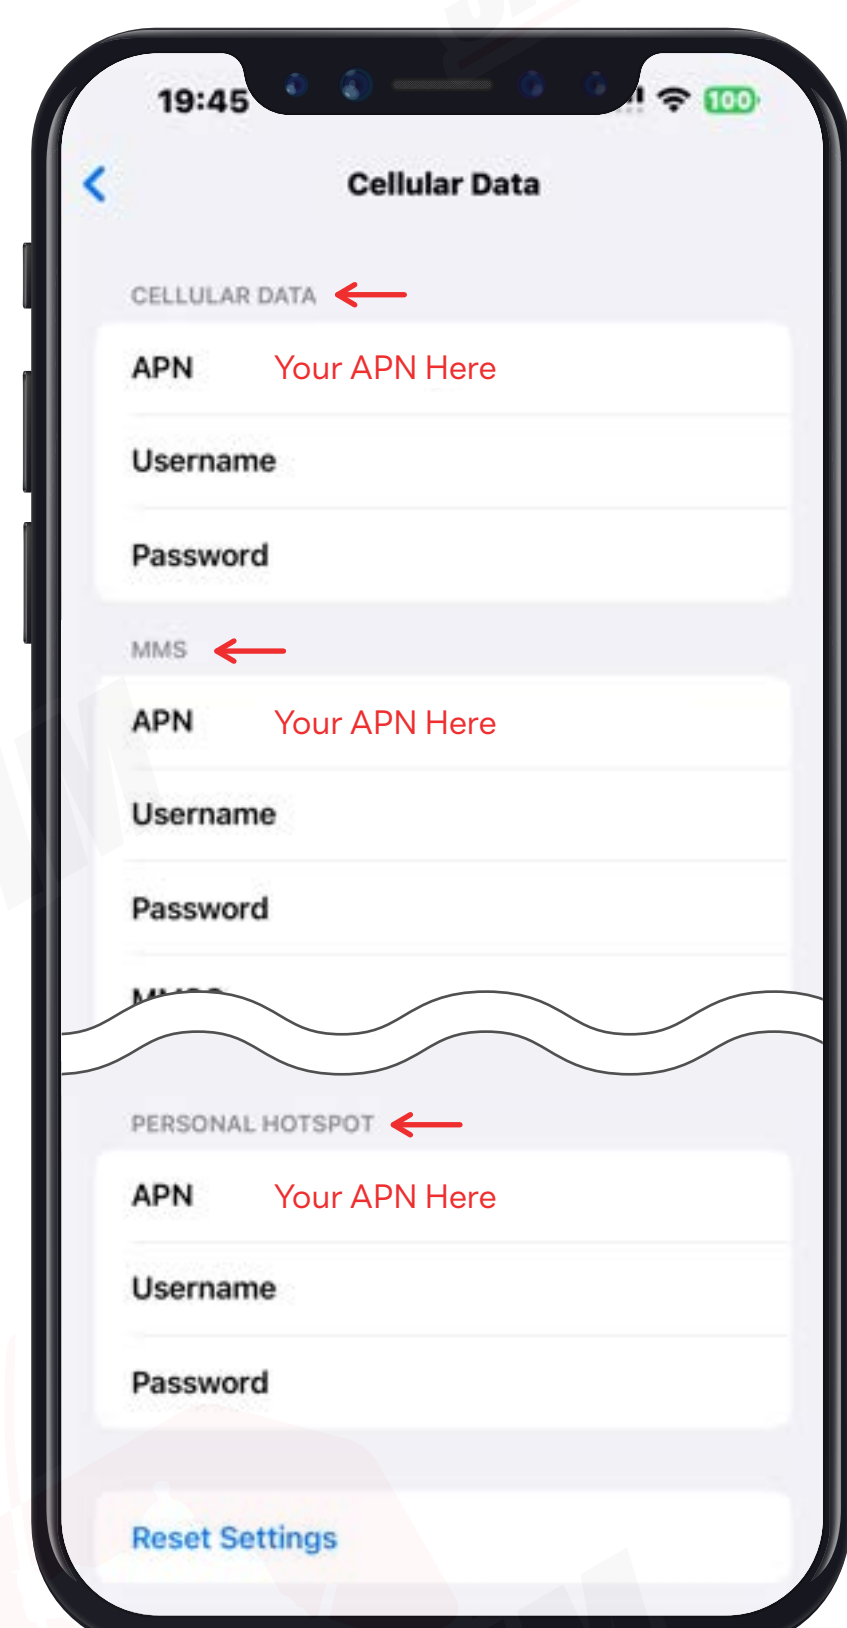

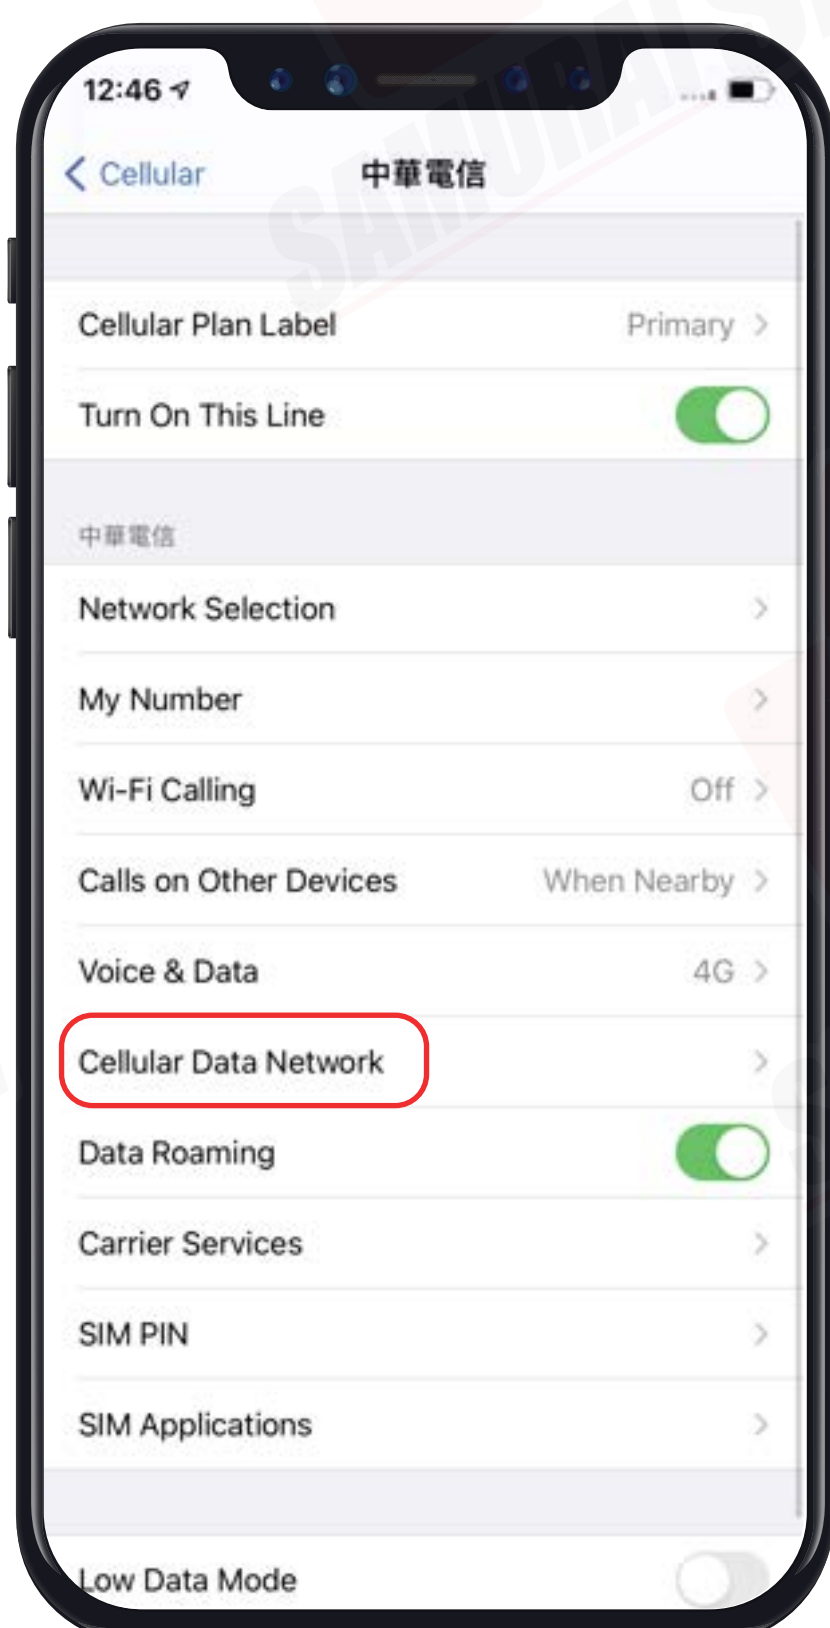

\ APN SETTINGS /

For iOS version 10 or later, APN settings will be automatically configured. If you are unable to connect to the internet or wish to use Hotspot sharing, please manually set the APN by following the steps below.

1 Go to Settings and tap on "Cellular"

2 Tap on "Primary"

3 Tap on "Cellular Data Network"

4 Set the "APN" according to your plan. (Your APN and APN name on P. 3) Once you've finished setting up, Then Enjoy!
