## \ What's Included /

- ① SIM Packaging    ② SIM Card    ③ SIM Ejector Tool

## \ APN Settings: KDDI (au) Package /

APN or "Access Point Name" is a set of configuration details required to connect to the internet. Since settings vary by country and network provider, please refer to the table below to configure your device:

	<5G NET>	<4G NET>
APN & APN Name	uad5gn.au-net.ne.jp	uno.au-net.ne.jp
Username	au@uad5gn.au-net.ne.jp	685840734641020@uno.au-net.ne.jp
Password	au	KpyrR6BP
Authen-tication	CHAP	CHAP

\*Normally, the system will be set automatically

# Getting Started

## Step 1

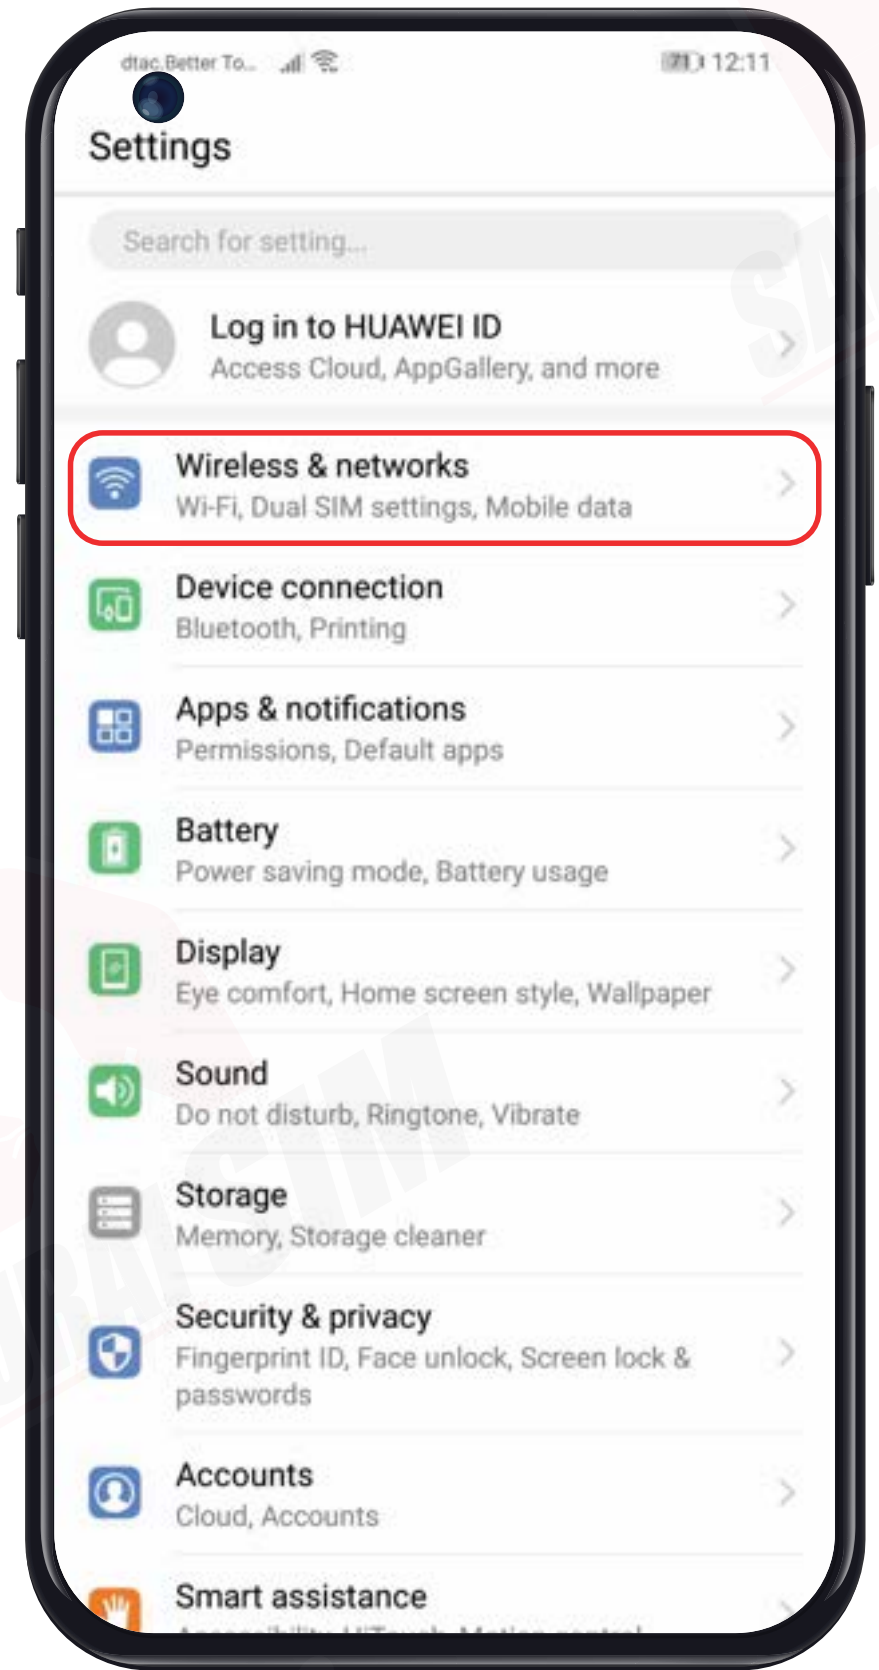

Upon arrival at your destination, insert the SIM card into your device.

## Step 2

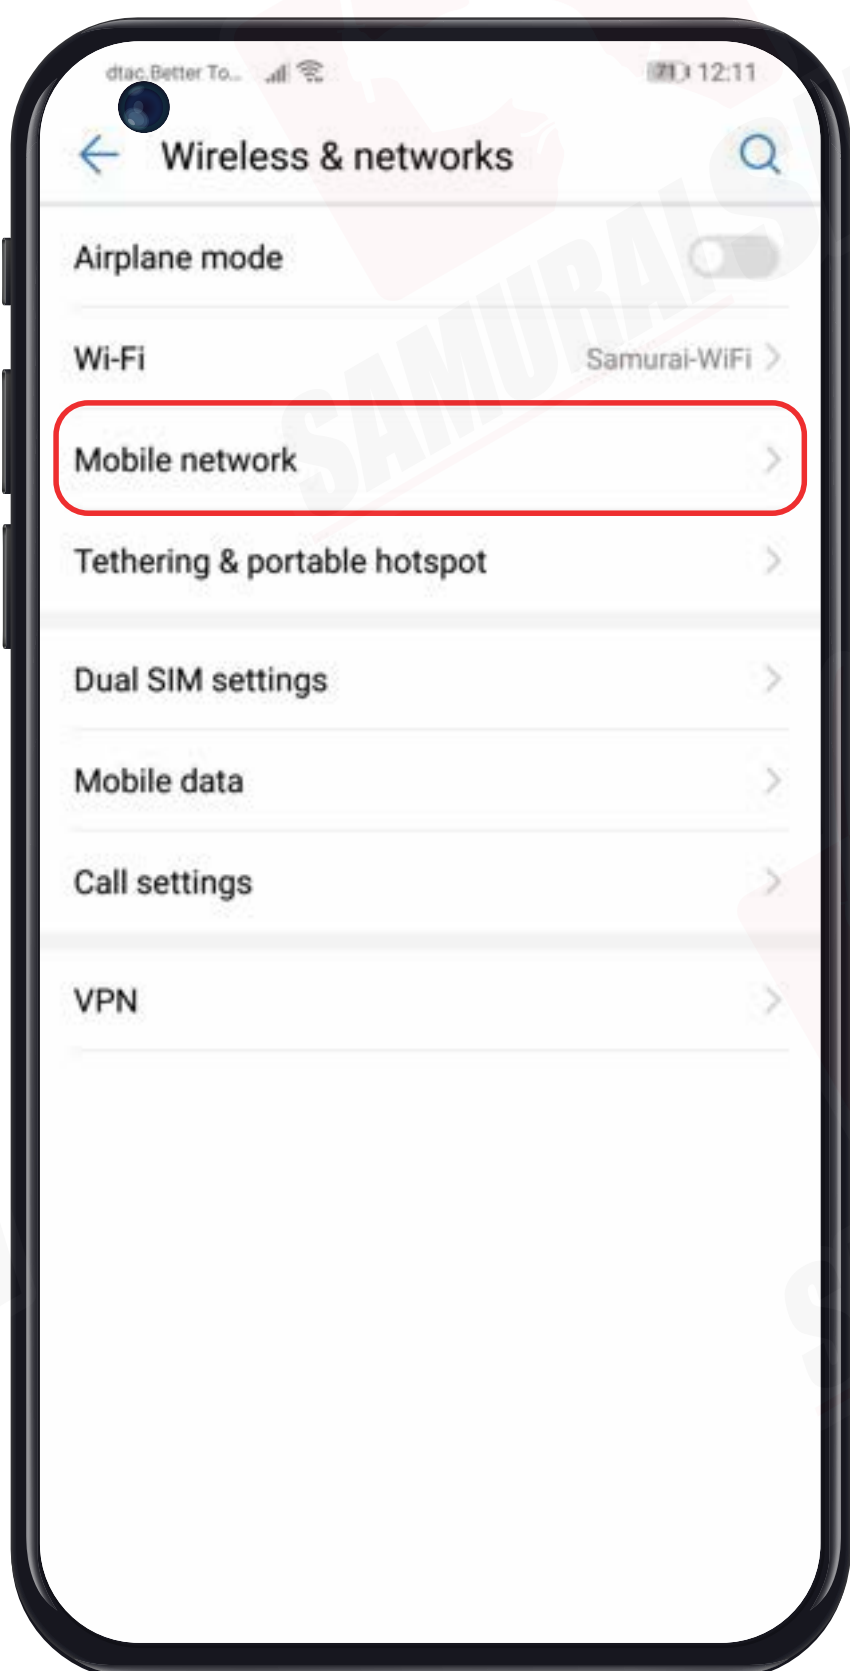

Wait a moment for your device to search for a signal. It will connect to the network automatically. Your service period begins as soon as the signal is received.

## Step 3

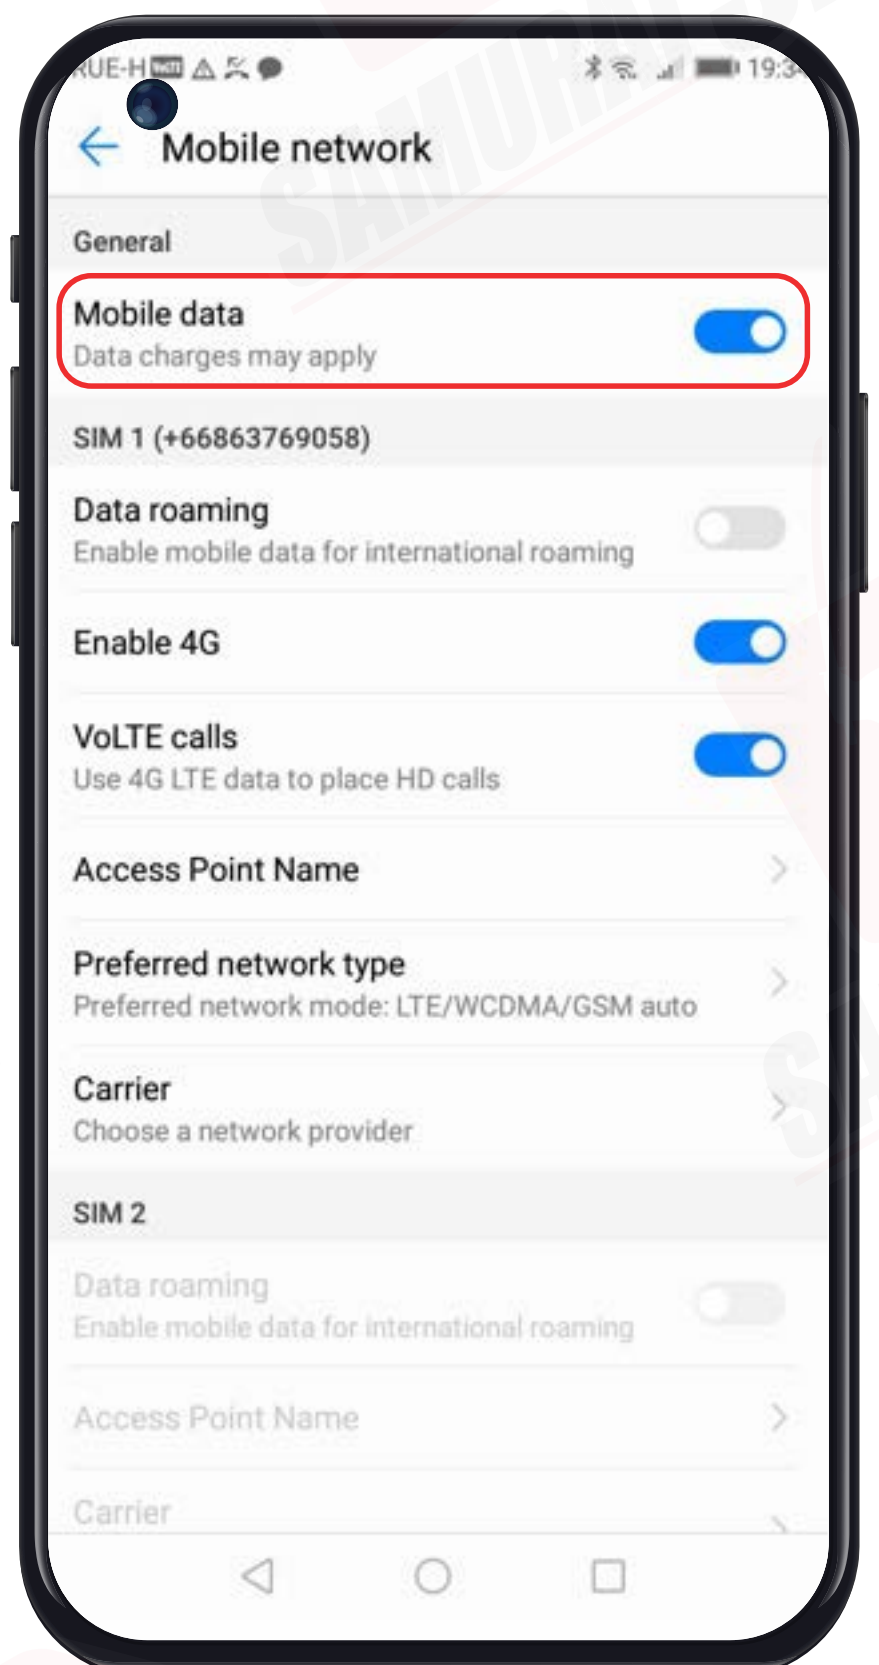

Turn on Mobile Data to connect to the internet.

1 Go to Settings and select Wireless & networks.

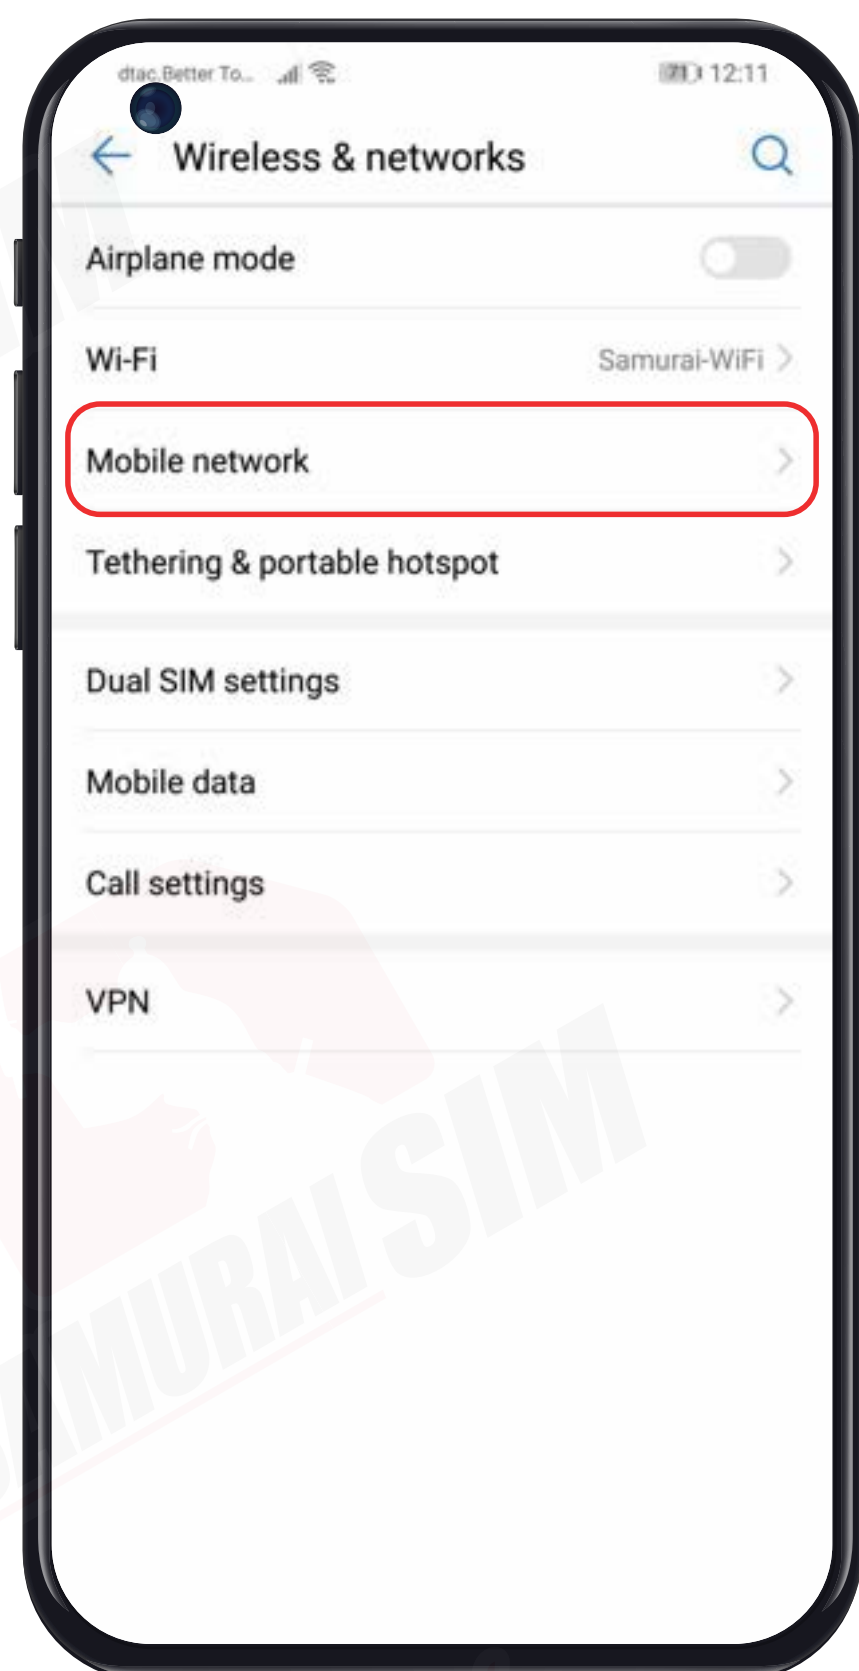

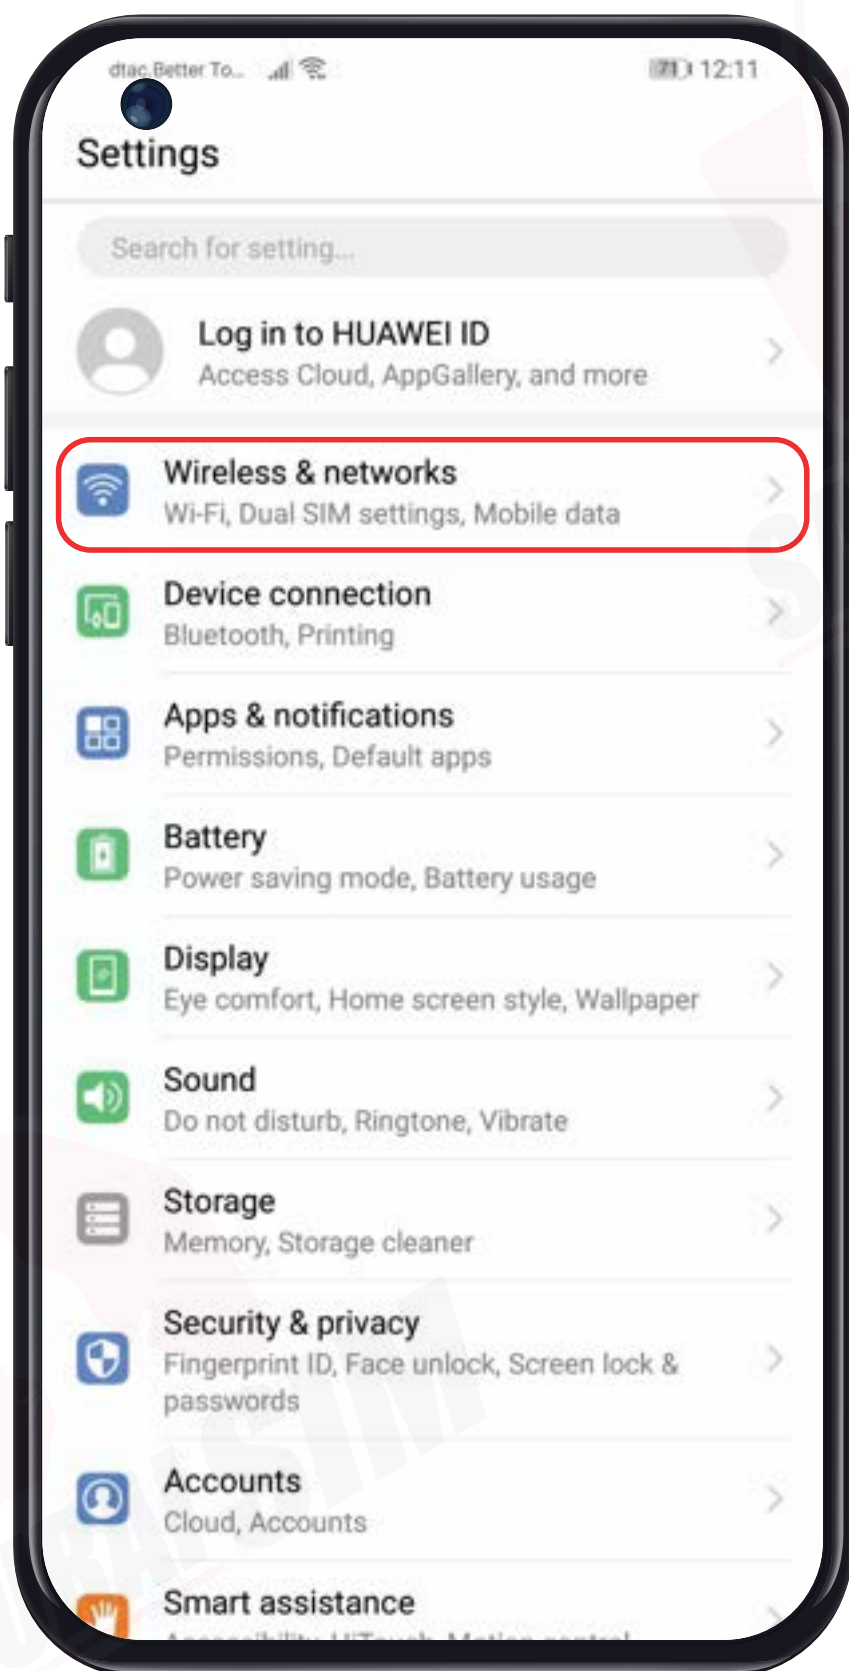

2 Select Mobile network.

3 Switch on Mobile

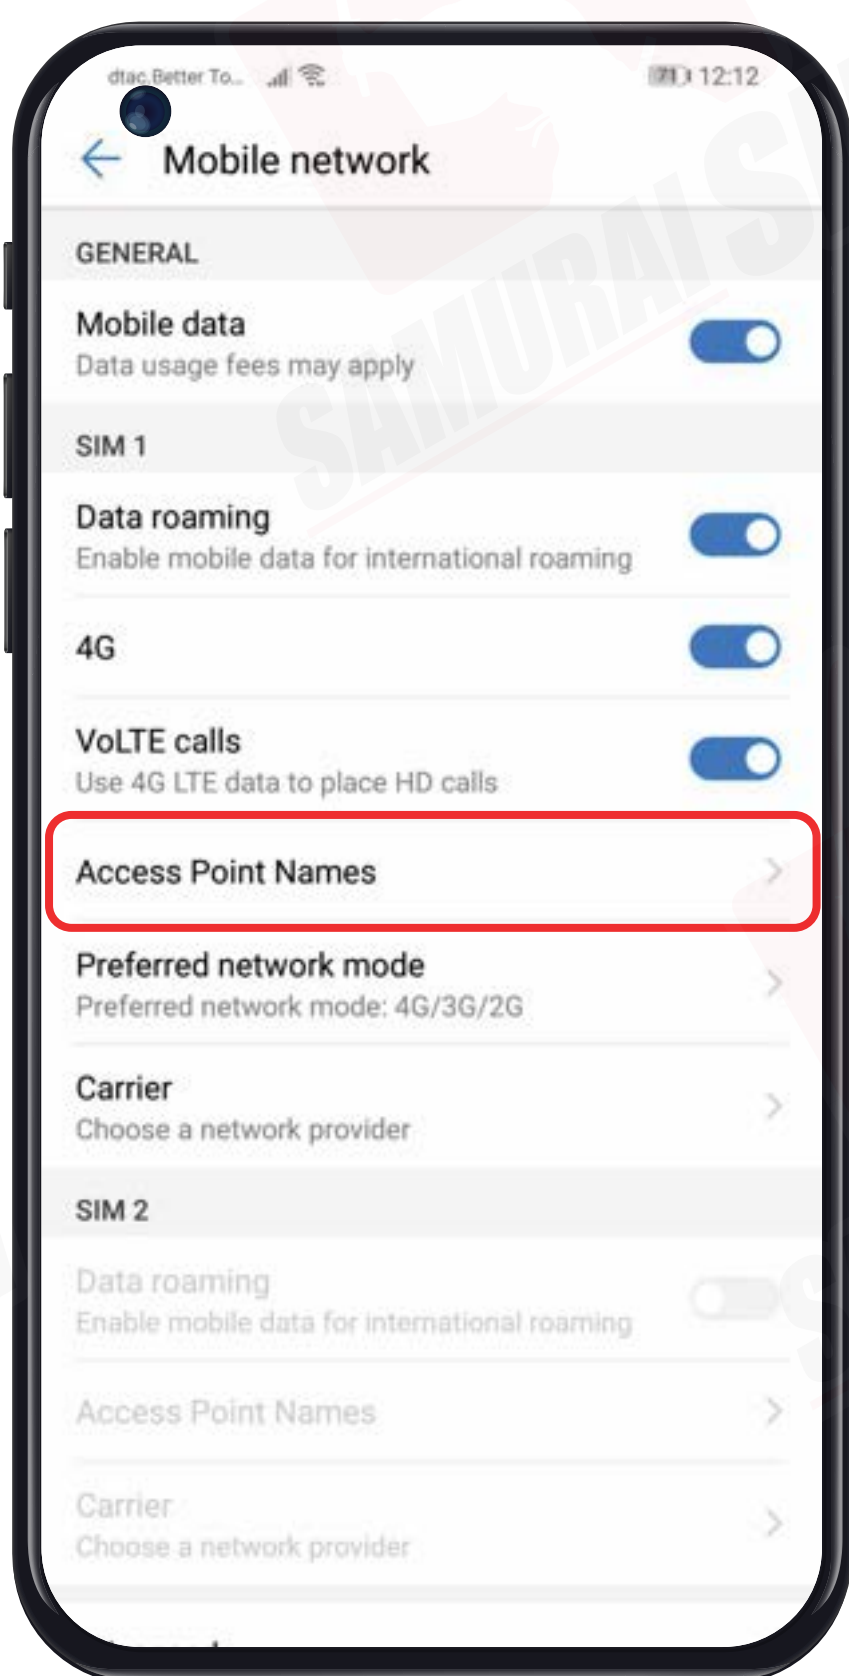

4

# How to Set Up APN

1 Go to Settings and select Wireless & networks.

2 Select Mobile network.

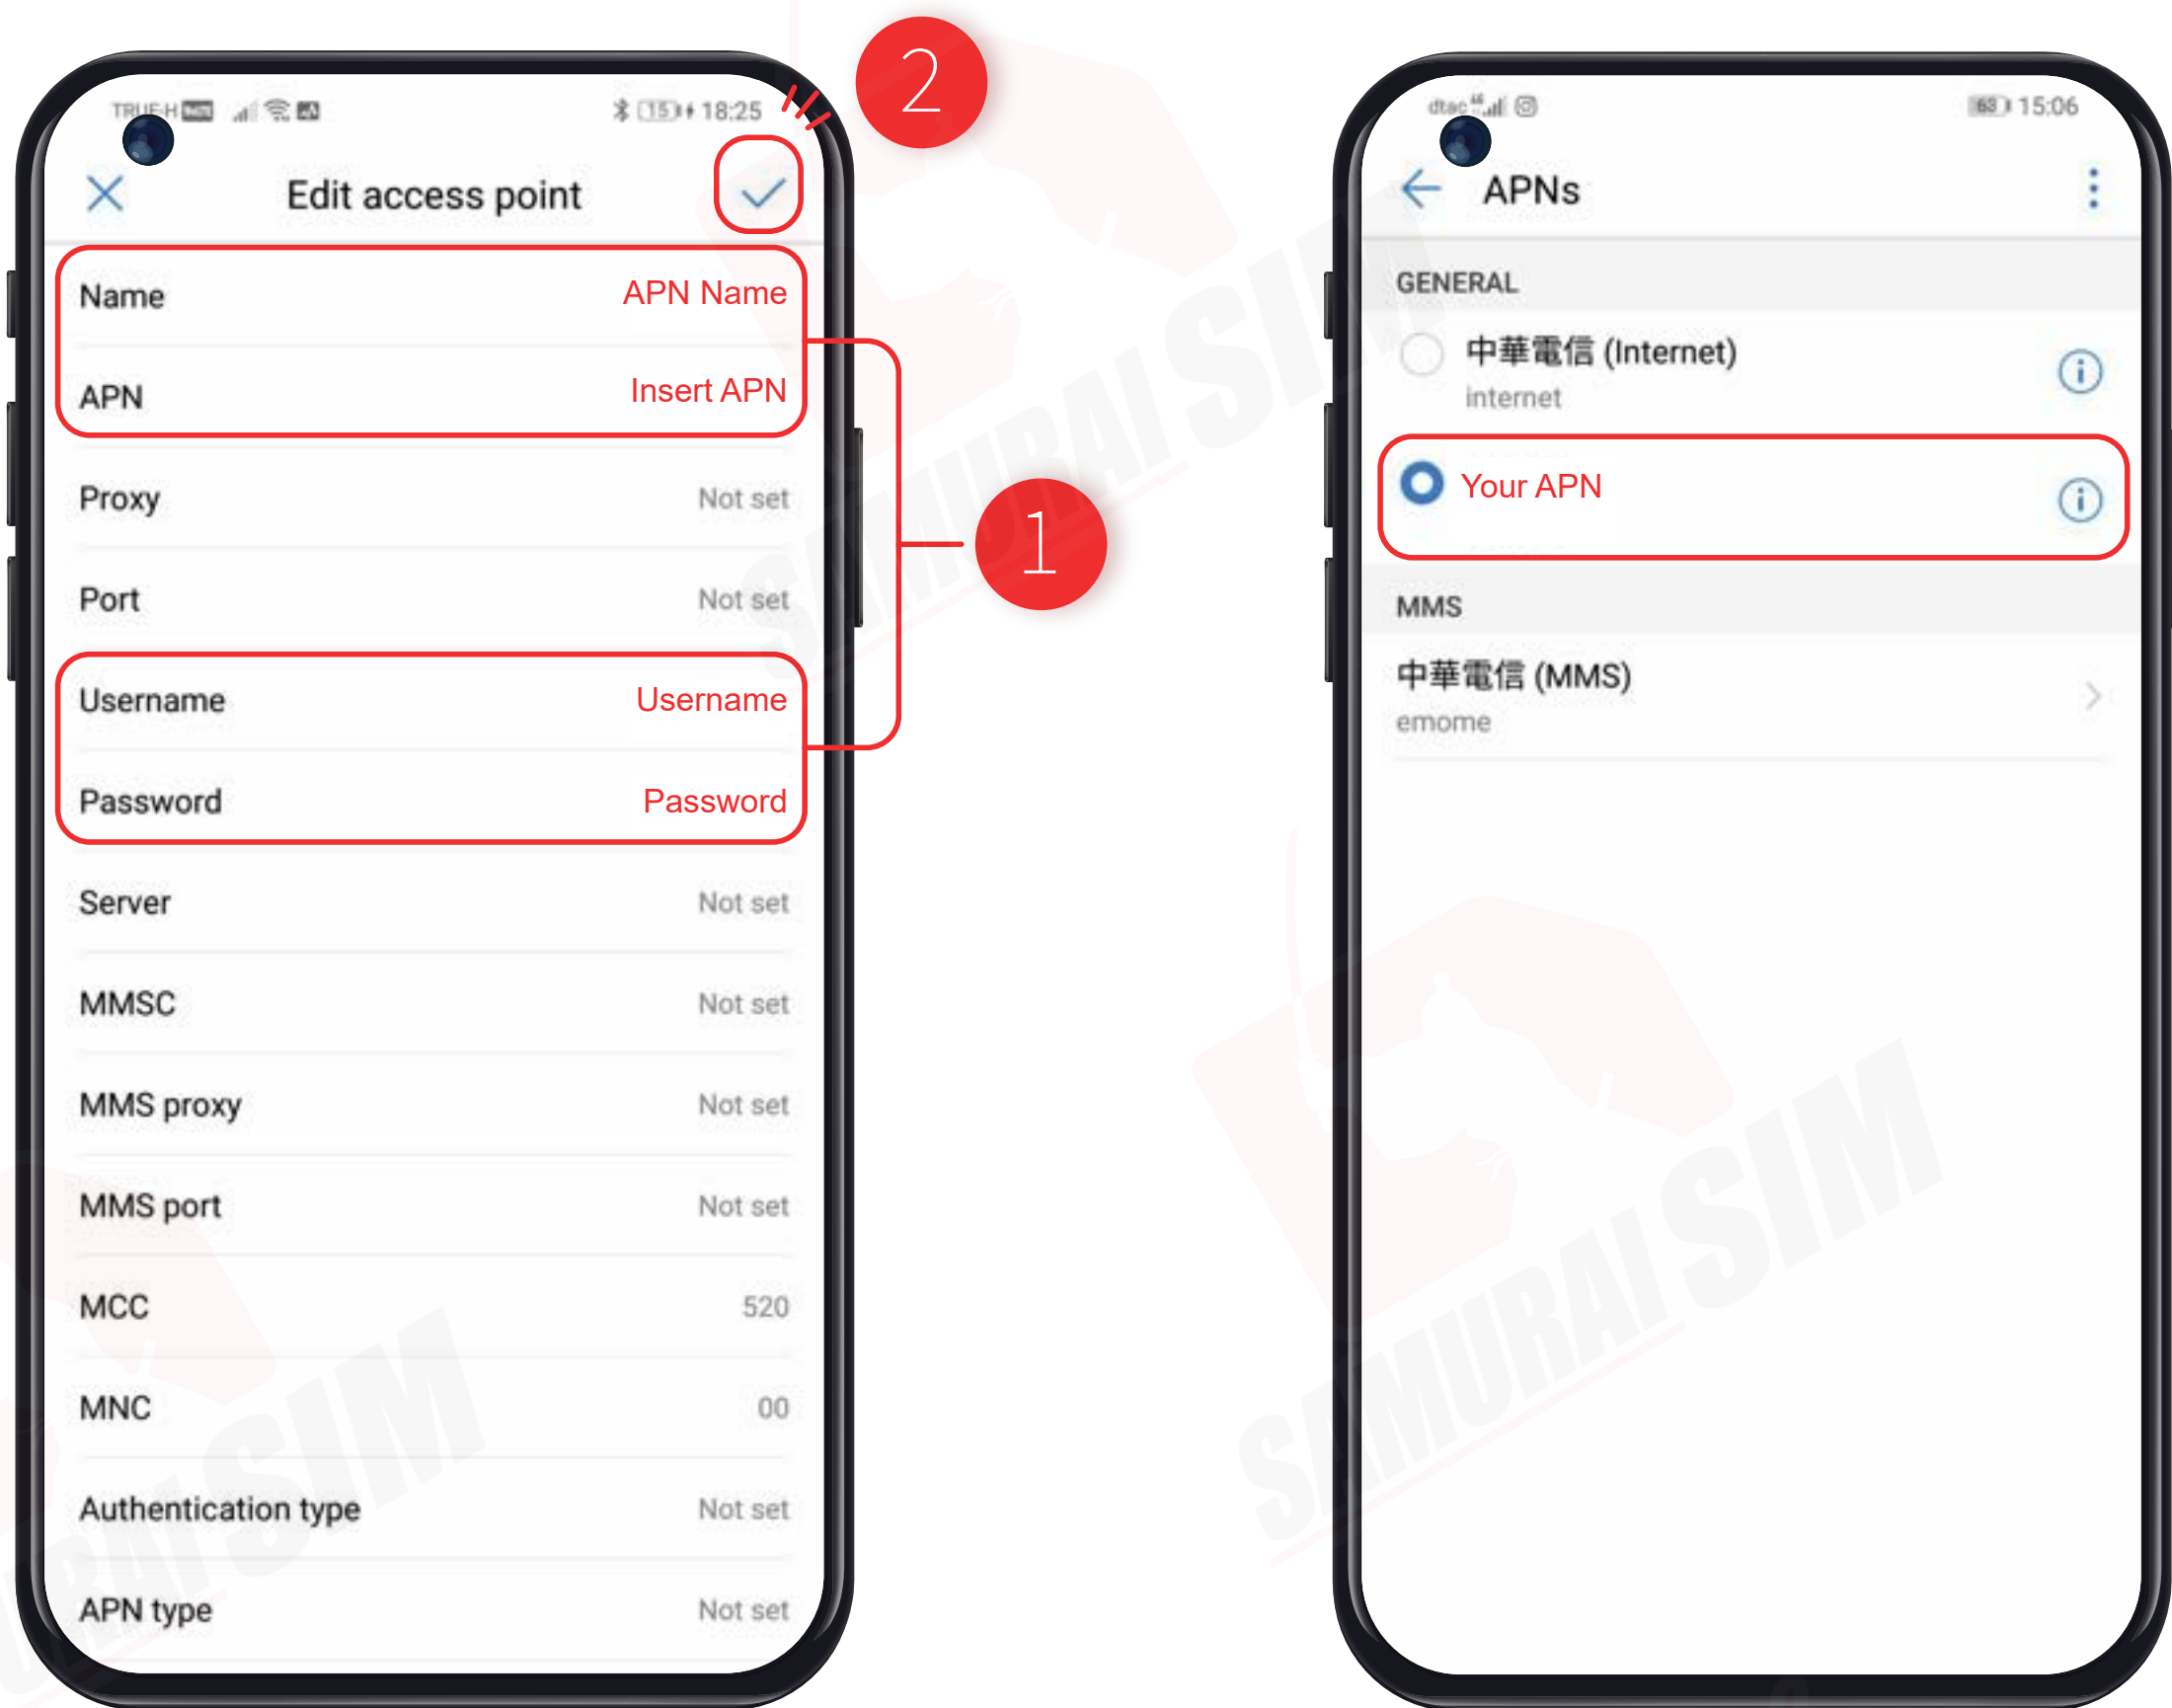

3 Select Access Point Names (APN).

4 Tap the three-dot menu ( ) in the top right corner and select New APN.

5

# How to Set Up APN

5 Enter the APN details according to your package (refer to the information provided on Page 3 of the manual), then tap Save or the checkmark icon.

6 Select the new APN profile you just created to activate the connection.
