## \ APN Settings: KDDI (au) Package /

APN or "Access Point Name" is a set of configuration details required to connect to the internet. Since settings vary by country and network provider, please refer to the table below to configure your device:

	<5G NET>	<4G NET>
APN & APN Name	uad5gn.au-net.ne.jp	uno.au-net.ne.jp
Username	au@uad5gn.au-net.ne.jp	685840734641020@uno.au-net.ne.jp
Password	au	KpyrR6BP
Authen-tication	CHAP	CHAP

\*Normally, the system will be set automatically

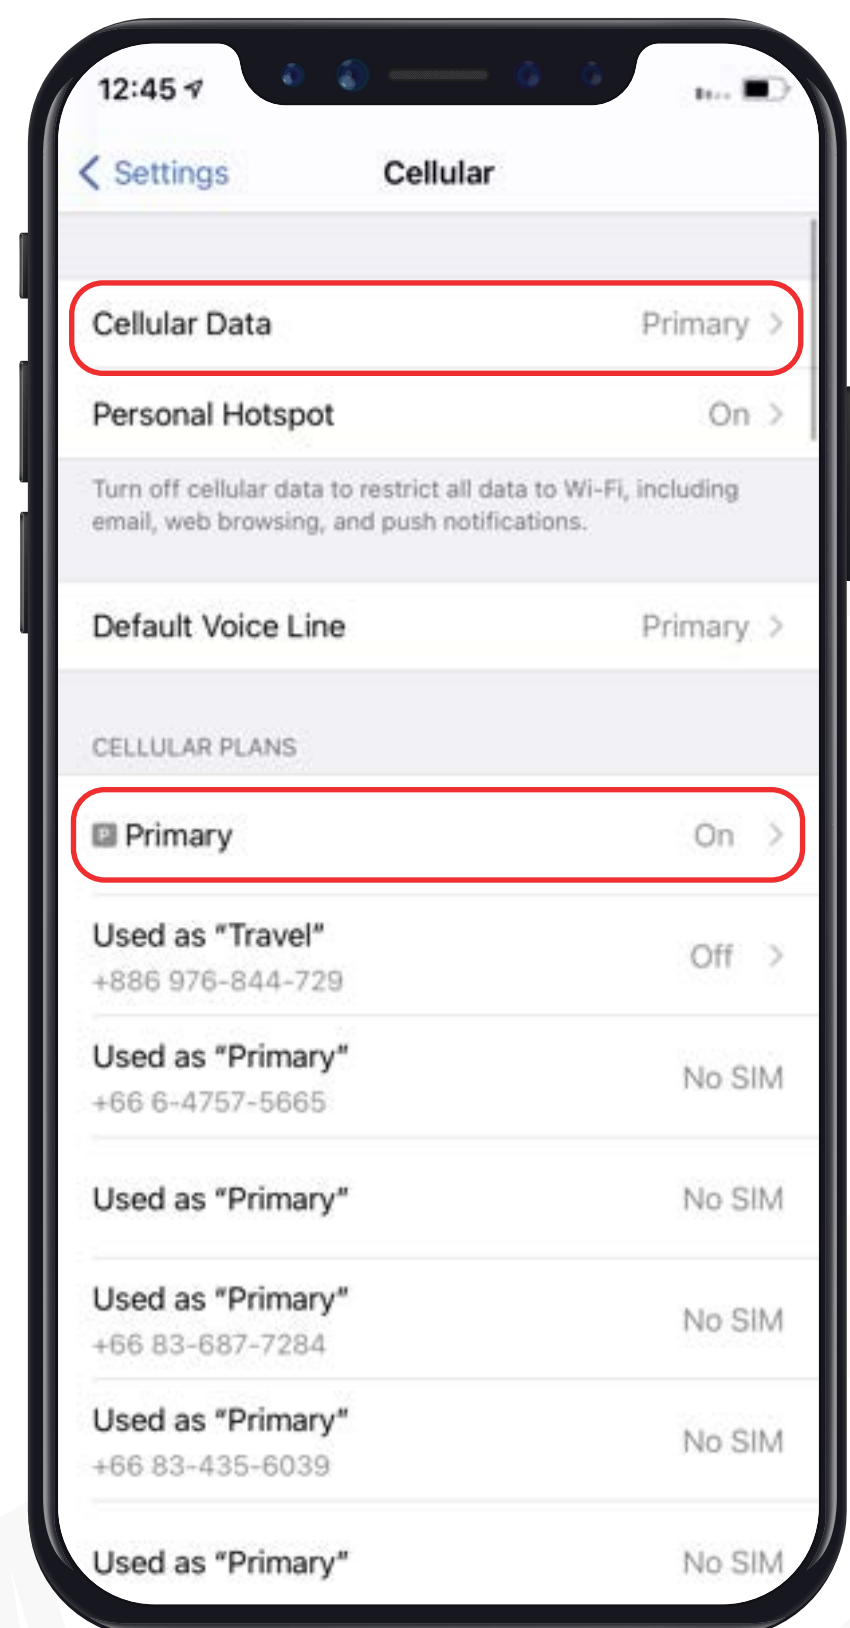

# Getting Started

## Step 1

Upon arrival at your destination, insert the SIM card into your device.

## Step 2

Wait a moment for your device to search for a signal. It will connect to the network automatically. Your service period begins as soon as the signal is received.

1 Go to Settings and select Cellular.

2 Enable your Primary SIM, then set Cellular Data to Primary as well.
